Re: Post-secondary Industry Certifications Earned Since 2013

Per your request at the March 7th meeting of the Board of Trustees, please find a graphic which represents the industry certifications earned while enrolled at a post-secondary institution since 2013. These data are made available to us through our access to National Student Clearinghouse provided by the Idaho State Board of Education:

This “treemap” graph represents the number of certifications as blocks where the larger blocks represent greater numbers. If you would like greater detail on any one area, please reach out.
