i-Ready Diagnostic National Norms: Grades K–8

Curriculum Associates Research Report | May 2022

Research Overview

This publication features the *i-Ready Diagnostic* national norms for Grades K–8. These norms are based on data from the 2018–2019 school year and apply to the 2022–2023 school year. As is common for national norms, it is expected that these norms will remain in use for a number of school years, although Curriculum Associates will continue to monitor the norms each year to determine when new norms are needed.

What are *i-Ready Diagnostic* norms?

Norms within *i-Ready* provide a way for educators to compare how their students are performing relative to other students across the country.

How do you interpret *i-Ready Diagnostic* national norms?

Norms are percentiles, comparing each student’s performance with a set of nationally representative samples of students in the same grade level who took the Diagnostic at the same time of year. For example, a student whose fall Diagnostic norm is 90 scored better than 90% of a nationally representative group of students who took the Diagnostic in the fall.

Normative scores, together with other types of scores such as *i-Ready Diagnostic* criterion-referenced scores (i.e., grade-level placements for reading and mathematics and for domains) help educators gain a more complete picture of student performance. Whereas *i-Ready’s* normative scores communicate how students perform compared to other students, criterion-referenced scores communicate what students know and can do against grade-level standards.

National norms corresponding to overall scale scores are available for both the *i-Ready Diagnostics* for Reading and Mathematics.

Where are the national norms located in *i-Ready*?

The *i-Ready Diagnostic* normative scores are labeled as “percentile ranks” in *i-Ready* and are located in various places on the *i-Ready* platform, such as the Diagnostic Results (Class) report and the Diagnostic Results (Student) report. Percentile ranks are also available in the Diagnostic Results export.

What dates are used for *i-Ready’s* norming windows?

The *i-Ready Diagnostic* assessment has three norming windows: fall, winter, and spring. The normative percentile rank associated with a given *i-Ready Diagnostic* scale score will differ across normative testing windows.

The national norming windows were slightly adjusted in recognition of when districts tend to have students take the *i-Ready Diagnostic* assessment. The old and new norming window dates are listed below.

	Fall Norming Window	Winter Norming Window	Spring Norming Window
New Norming Window Dates (Starting with the 2020–2021 School Year)	Beginning of School Year to November 15	November 16 to March 1	March 2 to End of School Year
Old Norming Window Dates (Prior to the 2020–2021 School Year)	Beginning of School Year to November 30	December 1 to March 15	March 16 to End of School Year

How often are *i-Ready Diagnostic* norms updated?

Consistent with well-established practices in educational assessment, the *i-Ready* national norms are evaluated every year to determine if an update is needed. The newest norms were those for the 2020–2021 school year, which are based on student data from the 2018–2019 school year and are appropriate for the 2022–2023 school year. The prior update was in 2015–2016.

When will *i-Ready Diagnostic* norms be updated again?

Curriculum Associates evaluates norms every year to determine if new norms are needed and will update the norms when necessary to ensure *i-Ready Diagnostic* norms continue to reflect student performance across the nation.

Technical Note: The Relationship between the Percentile Ranks in *i-Ready* Reports and Percentile Ranks in this Document

The original norming analysis conducted by Curriculum Associates resulted in tables that provide the percentile rank associated with *each i-Ready Diagnostic* scale score. When translating these results into tables that provide the *i-Ready Diagnostic* scale score associated with each percentile rank the following rules were applied.

- Where multiple *i-Ready Diagnostic* scale scores exist for a single percentile, use the lowest score corresponding for that percentile.
- Where a percentile exists with no corresponding *i-Ready* score, use the *i-Ready* score from the next percentile up that does have a score.
