Dear Community Member,

Since 2001, Lake City High School has had a rich tradition of sending our senior students into the community to learn, to serve and to contribute to the community that has given so much to them. We do this through the Senior Project, the goal of which is to involve students in active learning beyond the classroom. We highly value your generous contribution in providing real-life experience for our students.

As a community mentor, we encourage you to assist the student in the following ways:

- Allow the student to participate in your area of expertise. This can be accomplished through tasks or projects you assign to the student, through direct observation, or through an internship you design.
- Verify the number of hours the student contributes (at least 15) and complete a short evaluation of his/her work. (see the mentor/mentee agreement form)

When the student has completed his/her hours with you, he/she may request a letter of recommendation, but this is optional. We truly appreciate your time, expertise and willingness to invest in the lives of our community’s students.

If you have further question or concerns please contact me,

Aaron Short
